

The spirit  
of Khovanov  
& HF

Should include:

- old {
1. Algebraic Knot Theory & The 3 basic problems.
  2. The KI for KTC's & no-go thms. Mo, Duroso
  3. Some internal quotients Archibald
- new {
1. virtual knots & arrow diagrams (circuit algebras) GPV, Fiontan, Halachva
  2. Lie bi-algebras, E-K.
  3. The projectivization Paradigm
  4. wKO: within vKO, within comb. group theory, in 4D
  5.  $A^w$ , TDer, div, etc. [Alek-Tor spaces]
  6. BF
  7.  $\text{Exp}(t \rightarrow |)$  and tangle invariants.
  8. wAlek at various generalities: knots, links, tangles.
  9. Vertices and F, BCH
  10. KV in more than one way. what does it mean?
  11. Drinfeld's lemma and associators.
  12. More on EK.

New idea:

side 1

	u-knots $\xrightarrow{1-1}$	v-knots $\xrightarrow{0/1/0}$	w-knots (not used)
Combinatorics	$\mathbb{P} / R123$ = PAC $\triangleright / R123$	$\mathbb{Q} / \dots$ = CAK $\triangleright / \dots$	v-knots / OC
Topology	a braided picture	Surfaces mod stab.	Pictures
finite type	$X = \dots$	$X = \dots$	
Examples	linking numbers, Alex, Jones, Homfly	more	sr. linking #, Alex.
"chord diagrams"			
relations	YT	6T	YT, TC
Proj	$A = \dots$	$A^w$	$A^v$
Moral (Proj)	metrized Lie algebras	Lie bialgebras	
UFTI	Kontsovich CSW/BT/T	E-K $\mathbb{Z}_6$	$\exp(t \triangleright t)$ BF
Higher Algebra	Associators	QUEA	K-V (convolutions on Lie groups & algebras)
Topological implications	Algebraic Knot Theory		

Side 2 Algebraic uvw Knot Theory.
