

In the w -case, it may be that the proper replacement
for

$$K(00) \xleftarrow{d} K(0-0) \xrightarrow{u} K(0 \text{---} 0)$$

is

$$K^w(|0) \xleftarrow{d} K^w(|-0) \xrightarrow{u} K^w(| \text{---} 0).$$

Question Can the MVA be read off

$$\mathbb{Z}^w: K^w(1000) \rightarrow A^w(1000) \quad ?$$
