Trident vertices are length 3 strands? closed

= } Is unzip a type of surgery?

Can I use this stuff to make an easy proof of $grk^{v/b} = A^{v/b}$, with "v/b" for "virtual tangles modulo only braid-like R moves?"

Actually, where does GT arise here?

Q: Do "heads before tails" diagrams inject into A^v ?

Q What are the relations in $K^{gcs-rvt}$?
