

The Drinfel'd Element

April 24, 2018 6:27 AM

(180424) [BBS:VanDerVeen-170622](#), verification [Doubling.pdf](#), in $R_{12}^{-1} = S_2(R_{12})$ conventions. The Drinfel'd's cuap: $u := R_{12} // S_1 // m^{21}$, $v^2 := S(u)u$, $C := uv^{-1}$. Properties: $S^2(z) = u^{-1}zu$, $uS(u) = S(u)u$ and is central.
