

The 2D Lie Algebra

April-29-09
9:15 AM

$$[x_1, x_2] = x_2$$

$$([x_1, \psi_1])(x_1) = 0 \quad ([x_1, \psi_2])(x_1) = -\psi_1([x_1, x_2]) = \\ -\psi_1(x_2) = 0$$

$$\Rightarrow [x_1, \psi_1] = 0$$

$$\text{Likewise, } [x_1, \psi_2] = -\psi_2$$

$$[x_2, \psi_1] = 0$$

$$[x_2, \psi_2] = \psi_1 :$$

$$([x_2, \psi_2])(x_1) = \psi_2([x_1, x_2]) = \psi_2(x_2) = 1$$
