$$\frac{V_n}{V_{n-1}} \longleftrightarrow \frac{q^n}{q^{n+1}}$$

1. A polynomial is worth a thousand exponentials.
 2. Our role as mathematicians is to find cracks in the apparent incomputability of the universe.

Question Is the Krieger "Certificate of Wheeling" equivalent to the AT "Certificate of KV?"

Question - Is there an "Infinitesimal Alexander Module" for arbitrary group presentations?
Or maybe just for arbitrary quandle presentations?

Is there a "wheels space" for an arbitrary quandle / Leibniz algebra?
