

# The A Picture

August-28-10  
7:54 PM

$$\begin{array}{c} \swarrow \\ \downarrow \\ \searrow \end{array} = \begin{array}{c} \swarrow \\ \circ - \circ \\ \searrow \end{array}$$

$$\begin{array}{c} | \\ | \\ | \end{array} \begin{array}{c} \rightarrow \\ \rightarrow \\ \rightarrow \end{array} = \begin{array}{c} \pm \\ \pm \\ \pm \end{array} \begin{array}{c} | \\ | \\ | \end{array} \begin{array}{c} \rightarrow \\ \rightarrow \\ \rightarrow \end{array} \pm \begin{array}{c} | \\ | \\ | \end{array} \begin{array}{c} \rightarrow \\ \rightarrow \\ \rightarrow \end{array} \pm \begin{array}{c} | \\ | \\ | \end{array} \begin{array}{c} \rightarrow \\ \rightarrow \\ \rightarrow \end{array}$$

odd but easy to manage.

$$\begin{array}{c} | \\ | \\ | \end{array} \begin{array}{c} \rightarrow \\ \rightarrow \\ \rightarrow \end{array} = \pm \begin{array}{c} | \\ | \\ | \end{array} \begin{array}{c} \rightarrow \\ \rightarrow \\ \rightarrow \end{array} \pm \text{same deal.}$$

$$\begin{array}{c} \leftarrow \\ \leftarrow \\ \leftarrow \end{array} \begin{array}{c} | \\ | \\ | \end{array} \begin{array}{c} \rightarrow \\ \rightarrow \\ \rightarrow \end{array} = \begin{array}{c} | \\ | \\ | \end{array} \begin{array}{c} \rightarrow \\ \rightarrow \\ \rightarrow \end{array}$$

$$\begin{array}{c} \leftarrow \\ \leftarrow \\ \leftarrow \end{array} \begin{array}{c} | \\ | \\ | \end{array} \begin{array}{c} \rightarrow \\ \rightarrow \\ \rightarrow \end{array} = \begin{array}{c} \leftarrow \\ \leftarrow \\ \leftarrow \end{array} \begin{array}{c} | \\ | \\ | \end{array} \begin{array}{c} \rightarrow \\ \rightarrow \\ \rightarrow \end{array} \pm \begin{array}{c} | \\ | \\ | \end{array} \begin{array}{c} \leftarrow \\ \leftarrow \\ \leftarrow \end{array} \pm \begin{array}{c} | \\ | \\ | \end{array} \begin{array}{c} \leftarrow \\ \leftarrow \\ \leftarrow \end{array}$$

Maybe a BCH approach is now realistic....
