Is there a description of chord diagrams mod $2T$,
in the case of pure tangles?

$$\theta + \phi - 1$$

$$\parallel$$

$$\phi \theta - \alpha A$$

$$A = 1 - \theta$$

$$\phi = 1 - \alpha$$

$$\alpha A = (1 - \phi)(1 - \theta)$$

$$= 1 - \phi - \theta + \phi\theta$$
